Two Rivers Future Ready Skills Academy

Build 16 · Version 70 · October 2026 · frs.srczone.net

In this folder

1. **video** folder – the **Intro to the FRS Academy** video (it plays at the top of the demo's welcome page). A narrated walkthrough of Build 14 will be added next to it
2. **frs-review-demo.html** – try the app with sample data. Keep it beside the **staff** and **video** folders; **staff** holds the staff presentation's slides, PDF and PowerPoint
3. **FRS Academy APP Documentation** folder – **features**, **help guide**, **Data Security Report**, **AI Use statement**, and the strategic design set: **Strategic Design Plan**, **Portal Build Alignment Report**, the **Differentiation**, **Explicit Teaching** and **Student AI Use** plans, and the **Strategic Design Infographic**, plus the **Teacher PL Plan** (Teacher PL folder: Mentor co-teaching, AITSL Standards alignment and PL time count)
4. **frs-student-survey.html** – the student page for surveys on students' own devices (host it on the Academy website, or use the shared link)
5. **Samples** folder – an example slide deck, AI lesson prompts and a printable Academy summary

Try the demo

- **Computer:** download the file and double-click it to open it in your browser.
- **iPad/iPhone:** save it to Files, then open it in Safari (previews won't work).
- Use **Try as** (top right) to switch roles, including **Invited visitor**, and **? Help** for guidance.
- **New in Build 16:** in **Plan a report**, enter the number of lessons and the lesson length: the report shows the **Lesson delivery time (school-based estimate)** and a 📝 **Lesson script** button. As Teacher, open **My profile** to see **FRS Lesson Time** and certificates; the demo teacher is also a Lead teacher, so **My work › Teachers at my school** and **Invite a teacher** show the co-teaching tools. As School Leader, open **Teachers**; as Admin, see **Professional learning certificates** on the dashboard.
- **New in Build 15:** in **Plan a report** (as Teacher), three switches: **Differentiation** (Hero, Legendary and Immortal quests; schools can rename them), **Explicit Teaching** (core concepts, key vocabulary and numeracy only, with an EDI segments deck) and the **Student AI Use Guide** (AI level per task, a classroom AI poster and a student acknowledgement to print).
- Nothing is saved and no emails are sent. All names are samples.

Give feedback

1. Open the **FRS Academy app feedback** form from the link posted in the Teams channel.
2. Choose the part of the app, the kind of feedback, and write your comment. Your name is recorded automatically from your Department login.
3. Press **Submit**. Send as many comments as you like, one at a time.

Share the public preview

A public version of the demo, with a 6-minute survey for teachers and industry partners, is at **frsacademy.vercel.app** once the Build 16 files are uploaded to GitHub. Share the link or the QR code on its

welcome page.
