Future Ready Skills Academy

inspire

All contents, © Government of Western Australia 2026, unless otherwise stated

Our learning goals today

1. Understand the five Future Ready Skills (FRS), their curriculum links and this SE Metro school priority project
2. Explore where the FRS progressions came from and what they are for
3. Identify practical strategies for using the FRS in the classroom
4. Find FRS support and training resources

OUR STORY AND ORIGIN

From Robotics Clubs to whole-school pedagogy

Where it began. Australian Schools Plus supported the development of Robotics Clubs in Gosnells, Western Australia.

What we learned. Success in competitions showed that students need specific soft skills, not just technical knowledge.

What we built. Tracking how students developed these skills led us to create resources.

Where we are now. The framework is now a whole-school pedagogy across the district.

Why teach Future Ready Skills?

The world is changing fast. We don't really know what the future workforce will look like.

The specific skills students will need are hard to predict.

Students need skills that help them stay flexible and adapt to changing environments.

These skills don't come naturally to everyone, so they need to be taught.

Many students are good at the 'doing', but not the 'thinking'.

If students don't understand the skills, they won't transfer them to other areas.

What are Future Ready Skills?

Future Ready Skills blend cognitive and interpersonal abilities, preparing students for a dynamic society.

They align with the **Australian Curriculum General Capabilities** and with government and industry priorities.

Community means understanding culture

We added Community to the well-known 4Cs because understanding and connecting with people and culture is an essential part of 21st-century learning.

Community **Communication** **Collaboration** **Critical Thinking** **Creativity**

The 5Cs

Building Innovator Mindsets

Community

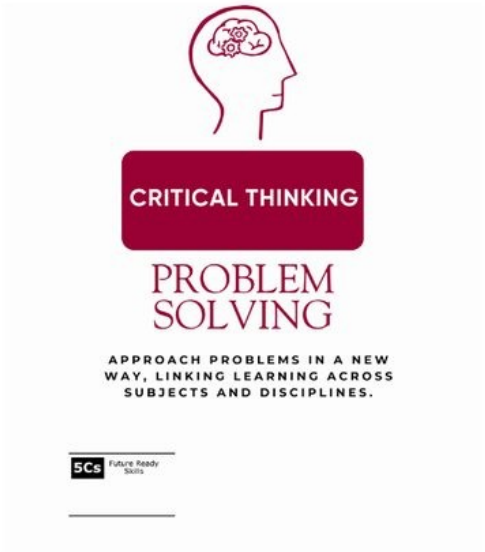

Communication

Collaboration

Critical Thinking

Creativity

Future Ready Skills

"Building Innovator Mindsets"

THINK · PAIR · SHARE

Discuss

Think about a recent lesson you taught. Which of the 5Cs did your students practise most effectively?

How did you observe this?

You might have said...

Group work: assigning roles	**Collaboration**
Debates and presentations	**Communication**
Problem-solving: fixing bugs	**Critical Thinking**
Art and design	**Creativity**
Local history and environment	**Community engagement**

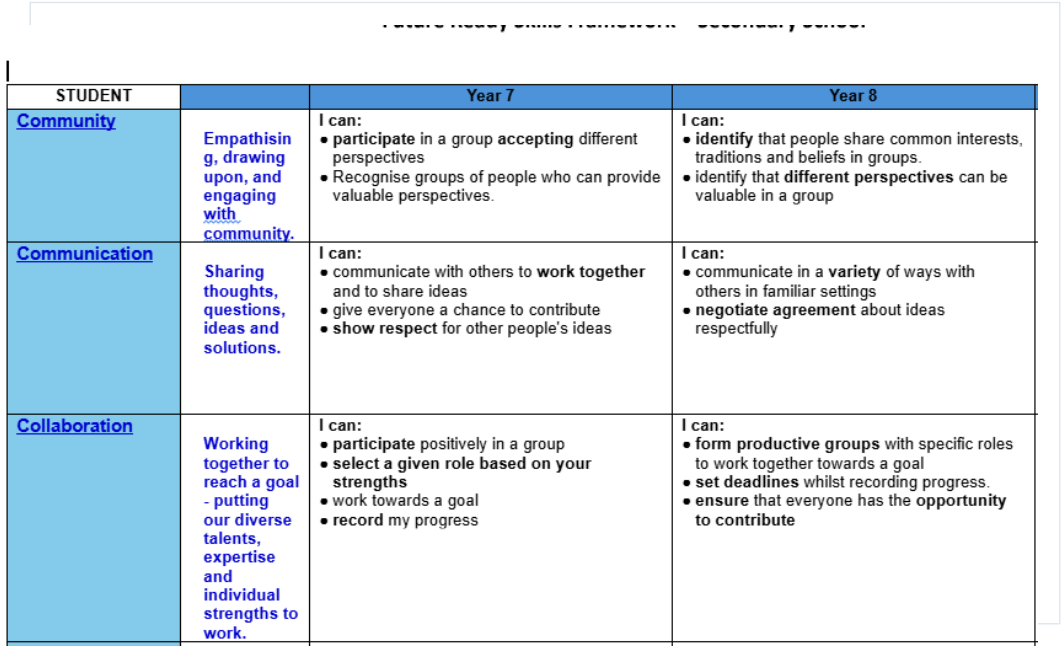

How the progressions work

Tracking growth

The resources on frs.srczone.net help teachers from Foundation to Year 10 **teach and record** students' progress in each skill.

The structure

The progressions describe the small steps students take as they develop each skill. **Bold text** marks a **new focus or element** at that stage of learning.

STUDENT		Year 7	Year 8
Community	Empathising, drawing upon, and engaging with community.	I can: • **participate** in a group **accepting** different perspectives • Recognise groups of people who can provide valuable perspectives.	I can: • **identify** that people share common interests, traditions and beliefs in groups. • identify that **different perspectives** can be valuable in a group
Communication	Sharing thoughts, questions, ideas and solutions.	I can: • communicate with others to **work together** and to share ideas • give everyone a chance to contribute • **show respect** for other people's ideas	I can: • communicate in a **variety** of ways with others in familiar settings • **negotiate agreement** about ideas respectfully
Collaboration	Working together to reach a goal - putting our diverse talents, expertise and individual strengths to work.	I can: • **participate** positively in a group • **select a given role based on your strengths** • work towards a goal • **record** my progress	I can: • **form productive groups** with specific roles to work together towards a goal • **set deadlines** whilst recording progress. • **ensure** that everyone has the **opportunity to contribute**

FUTURE READY SKILLS ACADEMY

Where to next?

Inspire · Aspire · Engage

Inspire · Aspire · Engage

A connected network of schools, teachers, universities, industry and education foundations. **Bringing the expertise to students, instead of students travelling to the expertise.**

INSPIRE

Meet STEM as exciting and accessible through robotics, AI, engineering, coding, cybersecurity, sustainability, design challenges and STEM professionals.

Could STEM be something I'm interested in?

ASPIRE

Discover the breadth of STEM careers and the pathways through school, TAFE, university, apprenticeships and industry, guided by role models.

Could I have a future in STEM?

ENGAGE

Work on real community and industry problems with mentors, university programs, competitions and workplace experiences.

How can I use STEM to make a difference?

INSPIRE → ASPIRE → ENGAGE

13 schools, one Virtual Academy

13

ACADEMY SCHOOLS

9 metropolitan schools in the Gosnells area, with Southern River College as Lead School

4 regional: Kalgoorlie Boulder CHS, Newman SHS, Marble Bar PS and Eaton Community College

The Virtual Academy

- A specialist teacher at one school can teach students across several Academy schools.
- University academics and industry experts reach many schools without repeated travel.
- Regional schools join specialist experiences without the full cost of travel.

- One expert lesson can inspire hundreds of students across the network.

Building lasting capability

Year 1 External experts and partners lead experiences while Lead Teachers build capability.

Year 2 Lead Teachers mentor colleagues and pre-service teachers and deliver professional learning.

Year 3 Experienced teachers train and mentor new schools as the Academy grows.

The Academy App: plan a report in six questions

AI learning plan

Unit overview, key questions and a 4–6 lesson sequence, labelled as AI-assisted and checked by you.

Intentions & criteria

Learning intentions for the year level, with editable "I can" success criteria for your chosen skills.

Curriculum links

WA Curriculum strand links, YEAWA entrepreneurial skills and WA STEM Learning Project modules.

Slides & prompts

Create a slide deck from your plan, or copy a lesson prompt for Chalkie and other AI tools.

Experts & partners

Request a guest talk, site visit or competition help from experts and industry partners who opt in.

Student surveys

Run start and end FRS surveys on a classroom device or students' own devices. No names are stored.

One App for everyone

Teachers

Plan reports, share your expertise in the directory, request experts and run student surveys.

School Leaders

A School console with reports, topics, FRS focus and survey results, plus printable summaries.

Partners & experts

Offer guest talks, site visits, competition help or sponsorship, and answer teacher requests.

Everyone

The FRS framework, resources, Academy Schools, a competitions and events calendar, and Help.

Privacy and AI by design

Contact details only for confirmed members, no student names in surveys, and AI plans labelled and checked by teachers.

Get started

Go to **frs.srczone.net** and choose your role. Use the Help and Feedback buttons on every page, or email frsadmin@srczone.net.

Student surveys

Run the survey after teaching a group what the Future Ready Skills are at the start of a year, semester or term. Survey again after reinforcement lessons in that period, so you have **pre and post** results.

Data is collected at Southern River College and shared with you as an Excel spreadsheet. Filter by your name or school to see your students' or school's results. The data will also be visualised, summarised and emailed to you.

Learning goals and summary

Our goals today

- Understand the five Future Ready Skills (FRS), their curriculum links and this SE Metro school priority project
- Explore where the FRS progressions came from and what they are for
- Identify practical strategies for using the FRS in the classroom
- Find FRS support and training resources

Summary

Future Ready Skills are vital for student success. The FRS progressions help us support and monitor students' development in Community, Communication, Collaboration, Critical Thinking and Creativity.
